Ziptrak®

Ziptrak® Track Guided Blind System Patent No. 2002300183

The New and Easy Way with Ziptrak® Blind System

SPRING LOADED – EASY TO OPERATE

- No Zippers
- NO Ropes or Pulleys
- NO Buckles
- NO Straps
- NO Flapping
- NO Gaps either side
- NO Struggle

For many people it is a difficult task to operate big window blinds or patio awnings.

CONVENTIONAL SPRING LOADED BLINDS have to be pulled down and held against the tension of the springs while the operator moves from side to side to fasten the bottom of the blind by means of buckles or leather straps.

This can be quite CUMBERSOME.

It is also extremely TIME CONSUMING for commercial operations.

THAT'S WHY WE HAVE DESIGNED AND DEVELOPED

What is unique about the ZIPTRAK® BLIND SYSTEM and sets it apart from any other are its specially designed slotted side tracks between which the blind glides smoothly and easily up or down and stops at whatever position you require.

Ziptrak®

THE IDEAL SOLUTION:

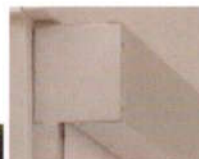

Ziptrak® Track Guided Blind System:

VERTICAL SCREENING MADE EASY AND QUICK TO OPERATE.

Extrusions are manufactured from high-quality aluminium and are powder coated to choice of colour.

PELMETS:
Optional

To PROTECT your Verandah or Patio from WIND and RAIN - while enjoying the view - you may use CLEAR or TINTED Quality PVC.

Ziptrak® Track Guided Blind System Patent No. 2002300183

Our New Track Guided Blind System is the IDEAL SOLUTION for all Vertical Screening

The Ziptrak® blind system makes vertical screening easy and quick to operate.

The blind can be easily pushed up or down. It will stay at whatever position you require. The blind can be locked in the down position to guard against high winds.
